Tech20Four

DIGIDOC CLOUD

DOCUMENT MANAGEMENT

Organize, Secure, Access, Anytime

CORE SOLUTIONS

DAS - Document Archiving Solution:

Converts physical business documents, correspondence, contracts, faxes, and letters into digital, searchable formats like MRC-compressed PDFs or JPGs using OCR and MCR technologies.

DWS - Document Workflow Managment Solution:

Digitizes internal workflow processes to eliminate endless paperwork, manual approvals, and optimize human resources. It enables you to design custom workflows with stages like submission, review, and approval, while tracking document revisions and allowing you to access previous versions anytime.

ECS - Electronic Contract Solution:

Provides legally sustainable electronic contracts using PKI-based advanced digital signatures with end-to-end encryption. This upgrades your business to top-tier security by using cryptographic encryption to prevent tampering and ensure document integrity worldwide.

KEY FEATURES

ADVANCED DIGITAL SIGNATURES

Uses cryptographic encryption to ensure document integrity, authenticity, and non-repudiation, making them legally binding worldwide.

SYSTEM SECURITY & CONTROL

Uses cryptographic encryption to ensure document integrity, authenticity, and non-repudiation, making them legally binding worldwide.

DOCUMENT AI CATEGORIZATION

Automatically classifies documents like invoices, contracts, and forms using AI to organize data faster and reduce errors.

ISO COMPLIANCE DOCUMENTATION

Automatically classifies documents like invoices, contracts, and forms using AI to organize data faster and reduce errors.

TRANSFORM ERP WITH DIGIDOC AI

Automatically reads customer and vendor invoices, extracts product details, matches delivered GRNs, and fetches approved PRs, GRNs, and POs directly from ERP.

SCANNER INTEGRATION & FILE SHARING:

Features scanner integration, secure file sharing, multiple search, and URL encryption.
